**High Quality Textbooks based on
UK Learning System and CBSE Pattern
for Pre-Schools & K-12 Schools**

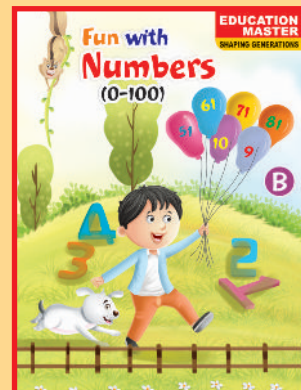

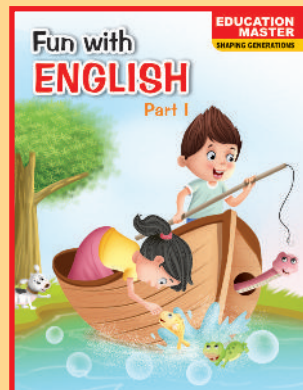

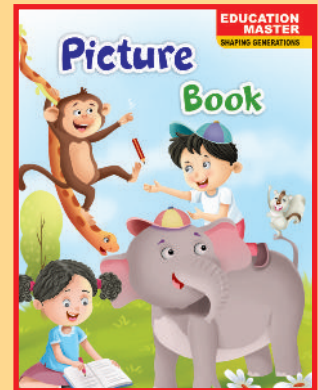

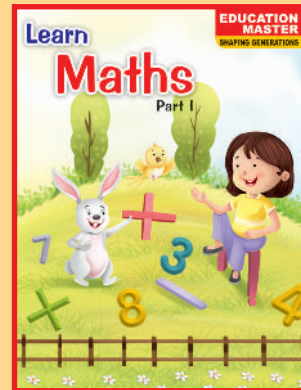

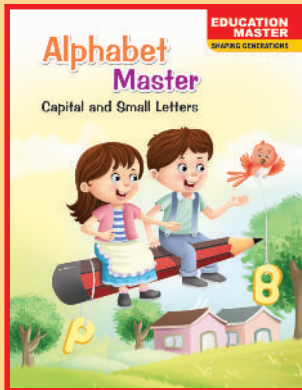

The School of Management & Career Improvement (SMCI) UK Limited has been working extensively for more than fifteen years to understand the UK-based pedagogy. When children begin their educational journey, they are encouraged to learn the basics of reading, writing and learning skills. Our purpose is to make the journey of the child from the first step till higher school enjoyable, enlightening and memorable.

SMCI aims that students are taught to think critically, to strive to attain high standards, to meet the challenges posed by technological advancements and to develop citizenship and basic values. Our books enhance the child's engagement, which can be worked at both levels-school and at home. Quality education leads to bigger and better results including an overall personality development and grooming, not just the grades. Our curriculum also helps the students in the application of the attained knowledge in the real world's day-to-day practical situations. By providing the right academic inputs and an effective developmental environment, we provide an academically enlightened citizen ready to excel in the next phase of education and life.
